

TENTH INTERNATIONAL CONFERENCE ON ANTIMICROBIAL AGENTS IN VETERINARY MEDICINE (AAVM)

Brussels, Belgium
June 30 - July 3, 2020

Abstract submission deadline:
APRIL 1, 2020

**SAVE
THE
DATE**

The Tenth International Conference on Antimicrobial Agents in Veterinary Medicine (AAVM), to be held in Brussels, Belgium from June 30 - July 3, 2020. This forthcoming conference follows the success of the past nine AAVM held in Helsinki, Ottawa, Orlando, Prague, Tel Aviv, Washington DC, Berlin, Budapest and Rome. This conference has emerged as one of the leading meetings in its field, which provides a very intensive program and encourages communication among the attendees.

Veterinary use of antimicrobials has raised worries for the potential of resistance transfer from animals to humans. Antibiotic resistance is often caused by the misuse and/or overuse of antibiotics, as well as poor infection prevention and control. Steps can be taken to limit the transmission of resistance, and also to prevent and control the spread of infections. Research on new and alternative antimicrobial molecules, early detection of diseases, biosafety and control measures for infections in intensive farms will also be in the spotlight in the upcoming AAVM meeting as well.

We look forward to welcoming you in Brussels.

Prof. Petra P. Cagnardi
Conference Chairperson

Prof. Stefan Soback
Conference Past-Chairperson
